Kolar's lecture hall

Clinical problems, Solutions and Innovations

Dr. Michael Cattell, Queen Mary University of London

ABSTRACT

Dr Mike Cattell (Barts and the London School of Dentistry, London, UK) will be talk about some typical clinical problems encountered in dentistry and some practical and innovative material science solutions will be posed. His work spans the synthesis of novel glasses, glass-ceramics, processing and the synthesis and application of novel drugs. He will also talk about his experience of transferring technology to industry.

Kindly invited.
