

PhD Student/Postdoc in Material Science and Engineering

Department for Nanostructured Materials at Jožef Stefan Institute (<http://nano.ijs.si/>)

Job summary

Applications are invited for a PhD position or a Postdoctoral Associate position to be involved in the European project on fast prototyping of rotors for brushless DC motors and actuators using 3D printing in a magnetic field which enables anisotropic alignment of hard magnetic material.

Job listing information

- Date posted 31 January 2023
- Closing date 28 February 2023

Key information about the role

- Location: [Jožef Stefan Institute, Ljubljana Slovenia](#)
- [Department for Nanostructured Materials](#)
- Category: Researcher
